AGRITEC

AGRICULTURAL LUBRICANTS

AGRITEC offers a complete range of oils from universal products to more complex formulations. Our products are exhaustively tested to meet and exceed the requirements of the latest OEM specifications.

A Super Universal Tractor Oil (SUTO) and Universal Tractor Transmission Oil (UTTO) are both suitable to use in hydraulic systems, transmissions, final drives and can be used with oil-immersed wet brake systems. However, using a SUTO is beneficial as it can also be used in an engine if the respective specifications are met.

Ask your local Aztec Oils distributor about using a specialist **AGRITEC oil.**

We do not recommend the use of a SUTO where emission control devices are fitted.

WITH ADAPTIVE MOLECULAR TECHNOLOGY

EMPROTEC

ADVANCED HEAVY DUTY LUBRICANTS

Agricultural equipment continues to face ever-tightening restrictions with their exhaust emissions requiring rapid advancements in engine and lubrication technologies. It is recommended that a dedicated engine oil and separate backend oil is now used for these applications.

Our low ash technology **EMPROTEC** heavy duty engine oils are fully compatible with exhaust after-treatment devices to help keep your equipment's exhaust emissions compliant in even the harshest of environments.

Need a heavy duty engine oil for your equipment?

Ask your local Aztec Oils distributor about using an advanced **EMPROTEC heavy duty engine oil.**
