

The Aztec Pledge

Aztec Oils Ltd is a UK-based lubricant manufacturer operating from an ISO 9001, ISO 14001 and ISO 45001 accredited facility in Bolsover, Derbyshire.

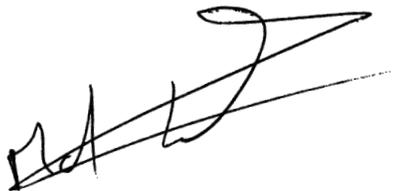

Every lubricant produced by Aztec Oils is blended, tested, and quality controlled on site using established procedures and modern laboratory equipment. This allows us to closely monitor formulation consistency and verify performance characteristics throughout the manufacturing process.

As signatories of the ATIEL Code of Practice for the development of engine oils, we operate in accordance with recognised industry standards and best practice. Continuous investment in laboratory capability and scientific instrumentation ensures that each batch is assessed against its defined specification.

We therefore guarantee that every Aztec lubricant will meet the performance claims and specifications stated on its individual Technical Data Sheet. This applies across all sectors we serve, including automotive, industrial, agricultural, and specialist applications.

Our products are used in markets worldwide, and this consistency of performance is central to our reputation. Customers can be confident that when an Aztec Technical Data Sheet specifies a performance level, the product supplied has been manufactured and verified to deliver it.

This pledge reflects our long-standing commitment to quality, accuracy, and technical integrity.

Mark Lord
Managing Director
